

ELECTRICAL PERMIT TYPES

COMMERCIAL & RESIDENTIAL

Commercial Electrical Permit Type Descriptions

Electric Vehicle Charging Station (C-EVCS) – for the installation of electric vehicle charging stations.

Example: installation of an electric vehicle charging station in the parking lot of a retail store or mall.

Floor Heat (C-ELFH) – for the installation of electrical floor heat systems.

Example: installation of a heated floor for an assisted living facility.

General Electrical (C-ELC) – for all electrical installations related to a commercial project.

Example: installations and/or modifications for a new commercial building; installation of equipment for commercial use.

Multifamily Electrical (R-ELCMF) – for all multifamily electrical installations typically of three (3) or more dwelling units.

Example: electrical installations for apartment buildings and multifamily settings.

Multifamily Temporary Power Pole (C-TEMP) – for the installation of temporary power to a multifamily residential building being constructed.

Example: installation of a temporary power pole for a new multifamily building.

Pool or Hot Tub (C-ELCPH) – for installation of electrical work associated with a pool, hot tub or splash pad.

Example: installation of electrical work for a public park splash pad; a pool and hot tub for an apartment (multifamily) building.

Service Reactivation (C-SERVE) – for the reactivation of service to a vacant commercial space that will soon be occupied or for the upgrade and/or change of service to a commercial building or space.

Example: reactivation of service for a small tenant improvement of an existing vacant tenant space.

Solar Array (C-SOLAR) – for the installation of all solar power generation systems installed near or on commercial buildings.

Example: installation of a solar system on top of a shopping center.

Street Light (C-STLT) – for the installation of all city street lighting and their associated installations.

Example: installation of street lights on the perimeter of a commercial development; street lights illuminating roadways.

Temporary Power Pole (C-TEMP) – for the installation of a temporary power pole for a new commercial building or project.

Example: installation of temporary power for a new ground-up commercial building under construction.

ELECTRICAL PERMIT TYPES

COMMERCIAL & RESIDENTIAL

Residential Electrical Permit Type Descriptions

Electric Vehicle Charging Station (R-EVCS) – for the installation of an electric vehicle charging station.

Example: installation of an electric vehicle charging station for use at a private residence.

Existing/Remodel (R-ELCEX) – for electrical installations and improvements at an existing location/property and for electrical installations of residential accessory structures.

Example: electrical improvements made to an existing home related to an interior remodel; installation of a new furnace or AC system; electrical installations for a shed or secondary dwelling unit.

Mobile Home (R-ELCMH) – for electrical service related to the placement of a mobile/manufactured/modular home.

Example: electrical service for the placement of a new mobile home in a mobile home park.

Floor Heat (R-ELFH) – for the installation of electrical floor heat systems; required for all heated flooring systems and is separate from other electrical permits.

Example: installation of a heated floor in a bathroom of a residential home.

New (R-ELC) – for all electrical installations related to a newly built home.

Example: electrical installations for a new home constructed in a subdivision.

Pool or Hot Tub (R-ELCPH) – for installation of electrical work and disconnects for a pool and/or hot tub.

Example: installation of electrical work for the placement of a new hot tub.

Service Reactivation (R-SERVE) – for the activation of new service, the reactivation of service or full services changes for residential homes.

Example: reactivation of service after meter removal; upgrade of service equipment; or new service equipment associated with solar or back-up power systems.

Solar Array (R-SOLAR) – for the installation of all solar/photovoltaic power systems and their associated equipment.

Example: installation of a new solar panel system or solar panel system with battery back-up.

Temporary Power Pole (R-TEMP) – for the installation of a temporary power pole and/or panels for new residential construction projects.

Example: installation of a temporary power pole for a new residential construction project.
